Google
Sheets Challenge

1 Create a New Sheet

Open your Google Drive and click on the RED new button. Click on Google Sheets.

2 Title the Sheet

Give your sheet a title by clicking on the words underlined untitled sheet in the top left-hand corner. This will become the file name your sheet will be saved as.

3 Create a Table

i) Create a two column table to record number of M&M's in a packet.
ii) Create a picture graph where the M&M's are movable - Insert - Image - Search

4 Collect Data

i) Sort the M&M's in to different colours.
ii) Arrange the M&M pictures to create a picture graph
iii) Record the number of m&m's for each colour in the table.

5 Insert a Column Graph

i) Select Insert then click Chart
ii) Click chart types tab to find a column graph
iii) Click customisation tab to make adjustments to the graph, for example:
--> title of graph
--> add values
--> change colour (NB: data can only be displayed in 1 colour)

6 Compare to another graph

Compare the data you have gathered by inserting another chart or graph. Which one represents the data better?

7 Compare It!

How does your data compare to others? Click Tools then create a form and ask them using a survey. Their data will be compiled for you when they respond.
